RAILWAY STATIONS, PORTS  
& AIRPORTS

# FOR A FUTURE THAT IS ALREADY HERE TODAY

The future will bring human-friendly cities, where technology, **environmental consciousness** and attention to **personal health** will merge into a **single reality**.

**Pradella Sistemi** has always strongly believed in this. It specializes in the research, production, development and commercialization of innovations for Smart Cities.

Pradella Sistemi, an innovative SME, **works to create technologies at the service of the community** such as interactive columns and benches with integrated charging points for electric vehicles, charging points for small electronic devices, intelligent lighting and AED defibrillators with high quality standards.

# FOR A NEW MOBILITY

Pradella Sistemi's products, which are also powered by **renewable energy** such as photovoltaics and wind power, are able to support integration with any technology to be recharged. The recharging systems are **secure** and protected from external attacks because they are **free of wi-fi connection**.

They also have an integrated **remote control system** that guarantees their operation and **full functionality**, with the added possibility of recording data on air quality and station utilisation.

more than **1000** USB sockets      over **3000** recharge points for electric mobility

**600** active installations      **200** defibrillators

**5** landing and equity crowdfunding campaigns

# REALISATION OF RECHARGING STATIONS

IN THE PUBLIC TRANSPORT SECTOR

We work to build intermodal connections that facilitate travel through **public transport** networks.

Our aim is to **connect public transport hubs** (such as stations, ports and airports) with those linked to the needs of people's lives, **such as hospitals, universities, technology centres, trade fairs and workplaces.**

Pradella sistemi's products are therefore the last useful piece to complete the infrastructures of a truly **sustainable** mobility.

In order to guarantee a **higher level of safety** for people, especially in places with a high flow of individuals, we have included in our products **Tecatech**, a defibrillator case with patents that allow the life-saving device to be stored in ideal conditions.

**MODULAR SOLUTIONS**  
WITH DIFFERENT SERVICES

**CUSTOMIZATION**  
PRODUCT GRAPHICS

**OFFGRID PRODUCTS**  
WI-FI FREE FOR SECURE DATA

**FLEET SUPPLY**  
OF E-BIKES AND SCOOTERS

**POSSIBILITY OF INTEGRATING**  
AN AIR QUALITY MONITOR, A WEB  
CAM FOR SECURITY

**REMOTE CONTROL SYSTEM**  
WHICH GUARANTEES THE FULL  
OPERATION OF THE DEFIBRILLATOR  
AND PROVIDES DATA ON THE  
UTILIZATION OF THE STATIONS

# PRADELLA SISTEMI FOR RAILWAY STATIONS, PORTS & AIRPORTS

## PANKA 4S

- Smart and interactive bench with 4 USB ports and one fast charge wireless induction charging point.
- Possibility to select wood or aluminium seat (wood-coloured or customised version) and possibility of incorporating IoT sensors.

## PILA AND B-RAIL OPEN

Electric vehicle charging rack specially designed for charging electric bikes and scooters.

- 8 charging cords with attachments from the main e-Bike brands (Bosch, Brose, Shimano and Yamaha);
- 8 stalls (4 opposite) to secure the e-Bikes during recharging;
- Possibility of installing a defibrillator, USB charging points for small devices and 4 schuko sockets.

## PILA 2.05 PLUS

Charging column for electronic devices

- 8 USB ports
- 4 schuko sockets

Possibility of inserting two charging cords for ebikes or electric scooters

Possibility to integrate Tecatech, patented defibrillator case
